Laszlo Szabo

What sensational stories could become public prop-

A beginning has now been made. Quietly, the Special Armed Services; Subcommittee on Central Intelligence Agency of the House has just released a 20 page publication entitled. "Statement of Laszlo Szabo."

Szabo was passed along to the Congressional Subcommittee by the CIA. which had been questioning him intensively. He had served for 20 years in the Hungarian Secret Service, his firsthand knowledge is exactly the kind of information has must be made. Red mechanism. and was able to relate from

This is merely a hint of the tremendously important guidance that can be erty, guiding attitudes de provided the American votcisively, if the CIA material. ing public if the undoccould be made available tored raw material prowhen not of a security nated duced by such first-hand witnesses as Szabo were published, instead of being buried in files as has been. the case hitherto.

Clandestine

Never before has the CIA subcommittee or other Congressional body dealing with this clandestine organization released an informational publication concerning CIA material.

Yet in a free society, if the public is to be an informed and not be an indoctrinated part of the policy-making apparatus, this

available to it, without being processed first by the State Department or any other Administration agency intent on putting across its version on how the American people should think and react.

Szabo also related Communist methods of penetration. He had first-hand knowledge of some of the more dramatic aspects of, Red intelligence operations which include the use of murder, forgeries and the recruitment of Western diplomats as Red agents by exploiting their vuinerabilier ties in character.

Red Mechanism

Of special importance in the Hungarian defector's testimony was the stress which the Communists place on creating a propaganda climate favorable to their aims. Szabo told how he was assigned by Pal Hadju, chief of the Evaluation and Assessment Department of the Hungarian Intelligence Service, to submit suggestions designed to undermine the relations between the United States and other Western countries - economically or otherwise."

In psychological warfare this is the familiar wedgedriving or splitting tactic. The Communists specialize in this. Surely, the erosion of the NATO alliance system and the animosities between France and the United States have all been abetted by this professional.
